

DYNAMIC DELIVERY

Optimization and management solution

It provides process optimization tools: to order management teams, drivers and customers.

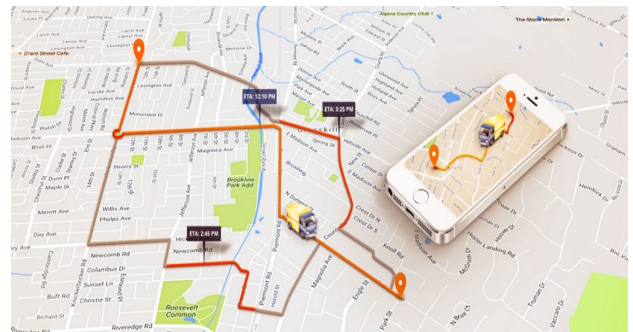

Automatic Order Integration

It allows automatic and dynamic integration with all types of order registration systems.

Route and Delivery Optimization

It optimizes the route and deliveries according to the vehicle's capacity, the weight and dimensions of the orders, and the delivery addresses.

Visit and Route Planning

Planning and scheduling visits, and dynamically optimizing routes by georeferencing.

DYNAMIC DELIVERY

Dashboards

Real-time information, desktop and mobile, with management reports, performance by salesperson, team or area, etc.

Gods View - Control and Visibility in Real Time

Visibility in the location and communication with the teams in the field. Monitoring the execution of tasks/visits.

Digital signature and Payments

Digital signature of documentation and payments during the visit by card, MBWay, wallets, ATM or contactless systems.

One Platform Web/Mobile/Desktop with tailor-made integration

Integration with your legacy systems, applications and cloud platforms through our proprietary API.
